

The Astorian

ASTORIA, OREGON:

WEDNESDAY, JUNE 27, 1883

Hon. M. C. George will orate at Gervais on the Fourth.

The order of A. O. U. W. has 250 members at Seattle.

The Capitals of Salem are about to purchase an Amoskag.

Sheriff Twombly has fourteen unfortunate in the county jail.

Hon. Rufus Mallory thinks that the Portland bridge will be built.

The A. B. Field will make her next regular Tillamook trip on the 10th of July.

The Salem fire department will help the Albany firemen celebrate the Fourth.

Miss Willard is earnestly prosecuting on the Sound the work she so successfully began here.

A. G. Spexarth has some fine Winchester rifles and double action Colt's revolvers for sale.

Mr. Nelson Hoyt, of Columbia county is in the city, his first visit to Astoria for thirty-four years.

The Columbia says that the country all around the new city of Lunenburg is bounded by speculators.

Last night of the Rogers Dramatic company at Liberty Hall. Reserved seats at the City Book Store.

J. B. Montgomery's Skamokawa mill is turning out large quantities of lumber. He will start a yard at Albion.

The internal revenue districts of Oregon and Washington have been consolidated, and J. C. Cartwright appointed collector.

Madame Janussek appears at the Occidental in "Mary Stuart" to-morrow night. Reserved seats at the New York Novelty store.

Astoria, Oregon is making very rapid progress. It has 24 salmon packing concerns within its limits, employing 5,000 people.—N. Y. Sun.

The Emma T. Crowell moved up to Flavel's dock yesterday to finish loading. The Ulock has 28,500 cases on, and will probably take on 4,500 more.

A representative of Eliphalet Bliss, of Brooklyn, N. Y., is in the city in relation to an alleged infringement of a patent of machinery in general use in the canneries.

The Lake County Examiner charges twenty dollars for timber land notices and ten dollars for notices of final proof. The Examiner is evidently in a hurry to get rich.

From a casual glance at the packages that Capt. Hobson was taking aboard the Quicksip yesterday afternoon, we infer that Knappton will have a wedding to report before long.

Simultaneously with the announcement that France and China will not fight, comes the news that the general of the Oregon state militia has appointed two additional aides-de-camp. So should some of his aides-de-camp he will have others left.

Nearly three tons of paper are stored in The Astorian office. If you have any job printing to do we guarantee to do it at the same price you would pay in Portland for the same quality of work. We buy in large quantities for cash, and our stock is laid down at manufacturers' prices.

The hard glove contest between Thomas Warren, champion featherweight pugilist of the Pacific, and William O'Neil, champion lightweight of Liverpool, England, for one hundred and seventy-five dollars and championship will take place at the Skating Rink Saturday evening, June 30th.

Parties who have returned from the Willamette valley report crops in a bad way. A good rain would help matters even yet, but the fruit is too far gone to recover. From one hundred acres of strawberries near Salem, it would be difficult to pick ten gallons, and the tree fruits are also dying out.

On the last steamer came a large number of well-to-do German immigrants, fifteen of whom will settle near Westport. Assuming that the immigration of 1883 will equal that of 1882 and 1881, these three years, it is estimated, will give the country not less than a quarter of a million of German farmers and mechanics, and over \$50,000,000 of German money.

Lieut Schwatka and party left Chiletan on the 7th of June on his prospecting and exploring trip to the Yukon country. Indians who went as far as the lakes with him report his arrival safely there, at which point he intends to embark in boats and canoes to reach the Yukon River. In this way he expects to spend some three months this year in the country.

The Drawback on Coal.

The new tariff allows a drawback of seventy-five cents per ton on all bituminous coal imported into the United States and afterwards used for fuel on steamers engaged in the coasting trade.

Under this law, the secretary of the treasury has prescribed the following regulations. Imported coal may be taken for fuel on board a departing vessel either before or after the payment of duties thereon, at the option of the owner. If the vessel named is engaged in the coasting trade a bond must be taken for six months, and in a penal sum equal to double the duties on the coal withdrawn. The collector may also require such additional evidence of importation and payment of duties as he may deem necessary. The weight of the coal covered by the entry shall be ascertained by the weigher at the expense of the owner, and upon such receipt, in case the duties have been paid, the collector shall issue a certificate of drawback; or, in case of withdrawal without payment of duties, a credit to the amount of duties accrued on the coal so withdrawn shall be given and noted on the warehouse bond. The coal taken on a vessel in the coasting trade shall be noted in the clearance manifest, and the bond given on its withdrawal cancelled, upon production of sworn declaration of master and engineer that such coal has been used for fuel upon the vessel. No portion of such coal shall be landed except upon payment of duties.

Serious Accident.

The account of the accident at Heron's Siding, Montana Territory, about 600 miles distant, received in this city last evening are very meagre. The facts appear to be that a freight and construction train were going towards each other, where they met at a heavy curve in the road where it was impossible for either train to be warned of the others approach. The fault is supposed to be with the train dispatcher. It is reported that two white men and from seven to forty Chinamen were killed and wounded. George Pike, one of the engineers, stayed with the engine until the last moment and then jumped into it to be caught under the engine's water tank, which fell on and crushed his head. The body was brought down to this city last night and placed in a coffin at Capt. Cook's place. It will be taken to Vancouver, where Mrs. Pike lives, for burial to-day. It is reported that as many as forty Chinamen on the construction train were killed. The passenger train was delayed three hours yesterday on account of the wreck.—Standard, 26.

Presentation.

Last Monday evening as the employees of the Astoria Iron Works were quitting for the day, they gathered in a group, and Alsey Fox with a few appropriate remarks presented Duncan Stewart with a wedding present of two dozen silver knives and forks. The recipient though taken by surprise responded in a manner that showed his appreciation of the generous gift. The set cost something over fifty dollars, and is a solid testimonial of the regard evinced by the boys toward their fellow workman.

The inquest held on the body of the drowned man found in the river near J. A. Devlin's cannery last Monday elicited no information as to the identity of the deceased. He was apparently 31 or 32 years old, light hair and mustache; had on red undershirt, blue overalls, had tattooed on his right hand some foreign flag, on his left an anchor and six.

We understand that Mrs. Dunaway will not deliver any address during her present stay, her visit being purely in the nature of a vacation from her arduous labors. It is probable, however, that she will be down during the first week in August, when we shall have an opportunity of hearing from his chief mover the progress of woman suffrage in the north-west.

The Indicator is authority for the report that along the banks of the river between Milwaukie and Oregon City are to be seen, lodged in the drift and among the rocks, thousands of river fish floating with their backs downward and exhaling a fearful stench. In many places hundreds of them can be seen floating together and emitting an effluvia that is a real "paralyzer" to anyone not raised in a glue factory or a Chinese wash-house. The cause of this terrible slaughter among the finny innocents is not quite clear, but is caused, so some say, by the blasting for rocks at various points along the shore, large quantities of which are brought down for building purposes in the two cities. The fish, in the hot weather of the past week have become very putrid and—just think of it—says the Standard, the people of Portland have to drink Willamette river water that contains these water-soaked and "ripe" aquatics.

Girl Wanted.

Immediately to take care of an infant. Enquire of A. V. Allen.

Bait for Trout.

George Willis, in Forest and Stream, says: "I speak from the experience of thirty years, and I never saw anything equal this. Take the neck and head of a red fowl; cut the neck off down to the breast, and the skin with the feathers on. Do not remove them until you want to bait your hook; then cut a strip like a worm and remove the feathers, but do not remove the little, bright glistening hairs.—When on the hook it is a most enticing bait, and being tough, hangs on well and looks bright. I have caught a basket of trout with one bait. Some times you may want a bait like a long grasshopper, or a large miller; this you can closely imitate by leaving on one or two feathers. Sometimes by cutting from the wattles, near the bill, with a feather or two, or a piece of the little feathers attached, will lure a trout when nothing else will. Thirty years ago I used to save two or three necks of fowls by placing them in the pickle in the pork barrel in the fall, so that I could use them in the spring, when it was difficult to get worms. They are so much better than worms, but a fresh neck is somewhat better than a salted one."

Salmon.

The Liverpool correspondent of the London Grocer says: The chief feature this week has been the arrival of the Lake Ontario river salmon. This consignment has been readily sold at a profit to the dealers at about current rates; and as this ship is believed to have brought the balance of various packs, the trade know pretty accurately the position, as nothing of any moment can be expected for the next five or six months. Undoubtedly the advent of warm weather places holders in a favorable position, as salmon appears to have seen about its lowest point. The recent holidays caused a cessation in the demand here, but greater activity for some time to come is expected to prevail. At present consumption is proceeding steadily, and grocers have only very small stocks. At this period there is usually great activity, and as it is well known that small stocks are held in the country, it is very probable that some advance in prices will quickly ensue. We quote 23s. to 24s. for Fraser river, and 24s. to 25s. 6d. for Columbia river.

That's So.

The steamship Arizona arrived at Sandy Hook at 6 A. M. one day about two weeks ago, and could not cross the bar until after twenty-four hours' detention. When she arrived it was too foggy. When in an hour or two the fog had cleared away it was low tide and the ship could not enter, although drawing only 20 feet forward and 23 1/2 aft. When the tide rose in the evening the fog came up with it, and thus the ship, after having made a very quick passage across the ocean, had to lie with her 800 impatient passengers almost in sight of New York for 24 hours, because of the bar that blocks up her harbor at low tide against vessels of 23 or 24 feet draft.

When a steamship is detained for a few hours at the mouth of the Columbia the whole country with its swarms of enemies of the Northwest, is aware of the fact. Detention at Sandy Hook is a much more common thing than at Astoria.—Polaris.

The Rogers Dramatic Company.

The curtain went up somewhat promptly at Liberty Hall last night, and the interest excited in the audience by the opening scenes of the play was maintained to its close.

"Phoenix; or back from the Grave," is a drama that abounds in startling scenes and the denouement is thrilling. To-night the company will present "Lady Audley's Secret" and will doubtless make as great a success of it as they have of the first two plays produced during the present engagement.
